

Your Gateway to the World

We open the gate on your road to success!

Since the origin of our company, our success was founded in truck transport and this still remains one of our special strengths. With our own fleet of vehicles and the support of strategic partners we transport your cargoes on the road to success within 24 hours throughout Germany. Fast, reliable and at a competitive price. For transports throughout Europe and on a Global basis we liaise with a long-standing international partner network. This makes us flexible and equally the right logistics partner for you. Whether a small load or weekly consolidated transports to Switzerland, Greece, Great Britain and Ireland, Spain and Portugal, right up to complete transportation in compliance with your instructions around the world – we take care of your logistics' needs so that you can plan perfectly and efficiently. With direct pickup and delivery guarantees you'll have a reliable link-up between your customers and/or suppliers as well as interface for transports worldwide. So trust our experience! We have been successfully transporting cargoes of all kind for a broad spectrum of clients ever since 1922.

Although well established on international markets, **Europe remains an integral part in our portfolio of competencies**

Our trucks are the strongest backbone of our service capability, whether we transport your goods within Germany or throughout Europe. For reasons of time and/or cost your products are frequently shipped to the recipient directly by road. If, however, other means of transport are available we'll facilitate variety of surface transportation to meet your demands, or we can provide an alternative way of shipping your goods. In doing this we obviously also use inland water transportation (barge) and rail. The integration of regular rail transport in a comprehensive logistic concept can, moreover, help us to reduce storage capacity. Here, too, you profit from our extensive experience and our own fleet of trucks within Germany which can provide the flexibility to balance out sudden supply chain requirements.

No ships of our own, but **the complete and integrated service level of a shipping company**

We combine the advantages of a shipping company with the flexibility of a charterer. And that proves itself not only in the case of global transport on the seven seas but especially also with our individual services on the North Sea, Baltic and Black Sea, as well as on rivers and canals. We plan the whole door-to-door transport process for you – obviously including all customs and duty formalities. A speciality here is the handling of bulk goods of every kind, which we can ship as complete tonnage as well as in 20' or 40' containers in keeping with the times. Whether bulk goods, general cargo or project, we will optimize the entire transport process through individual planning and service. Our commitment's final goal is to relieve our customers as much as possible.

Your international transit commodities are in **save hands** by selecting Th. Reimler as your service level provider

We organize the full scale in regards to ocean freight:

- Loading of bulk consignments on complete or part-charter basis
- Shipping of 20' and 40' containers
- Pre-carriage and on-carriage of 20' and 40' containers by road, rail and barge
- Loading and packing service
- Heavy goods handling involving all modes of transport
- Dangerous goods transportation

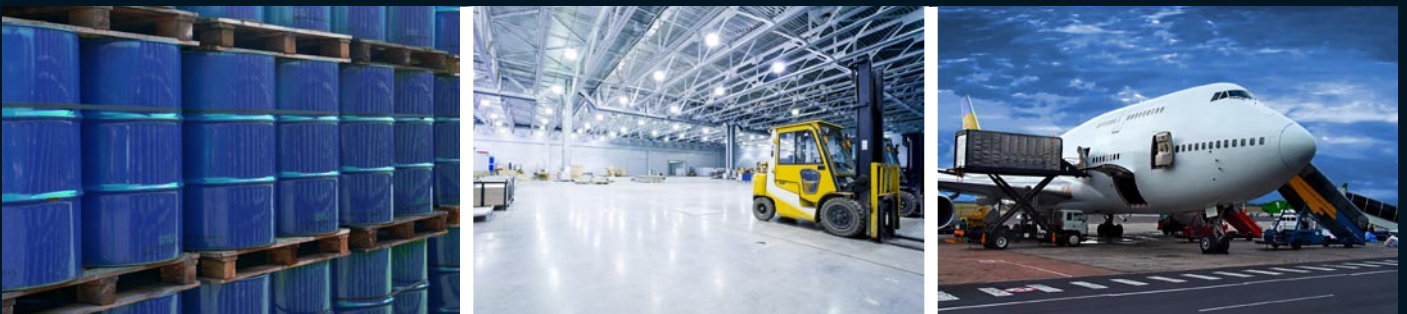

**We always have
the right solution in store!**

It's well known that time is money. But space, manpower, raw materials and semi-finished products are money too – even more than ever. Our service is designed to give you optimal support in your production processes. The combination of various means of transport contributes to this just as much as our extensive storage areas from which we manage the supply and delivery of your products exactly as you ask. In this way our storage facilities help to reduce your own, a service that an increasing number of customers make use of. Also our recently established branch in Albershausen, Frankfurt has a range of storage options available. We can handle all customs and import formalities for you at either locations.

Logistics origins from formal logic paired with experience!

The shortest line between two points is the ultimate logistic concept. You will certainly save time and money when we plan the logistics around your goods. The logic of logistics follows its own routes – and we know what they are! Acquisition and transport have become an integral part of the supply chain, and thus a success factor. That's why our service covers the processing of imports and exports and payment of duties just as much as the short or long-term storage of your products in our recently expanded warehousing facilities. In addition, the worldwide transport of urgent consignments such as air freight is yet another range of services available to our clients. This is where you profit from the personal and individual service provided by Reimler and our strategic partner network just as much as from our experience on international transports.

You need individual logistics services? Then speak to us! We'll find a solution together.
We are your gateway to the world!

Everyone
talks about
globalization.
We live it!
